

Class 22: Subspace or Not?

Parallels between subspace proofs and linear transformation proofs

[illegible]

Practice

$$1. \quad W = \left\{ \begin{bmatrix} a \\ b \\ c \\ d \end{bmatrix} : \begin{array}{l} a+b+c=d \\ 2a-b-d=0 \\ b+c=a \end{array} \right\}$$

$$2. \quad H = \left\{ \begin{bmatrix} s+2t \\ 3s-t \\ 5s \end{bmatrix} : s, t \text{ are in } \mathbb{R} \right\}$$
